WaspLabeler V6 Barcode Label Design Software

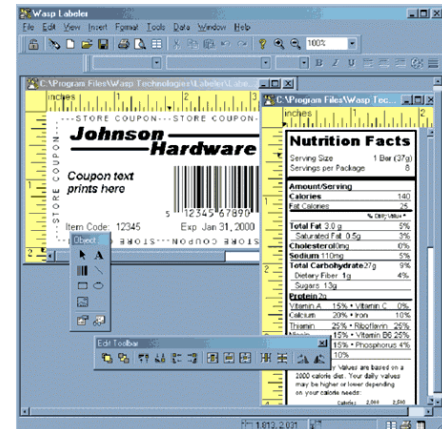

WaspLabeler barcode software is one of the best selling barcode label design programs in the world. WaspLabeler V6 makes creating barcode labels easy. Manually input data or easily connect to a database to obtain your label data. Using WaspLabeler's Wizard interface, you can quickly create inventory, asset, shipping, and many other labels. WaspLabeler now includes RSS and ISBN barcode symbologies and supports custom fields from QuickBooks® accounting software.

Benefits

- Quickly create and print standard or custom inventory, asset, shipping, and many other type of labels

Features

- Includes over 100 label templates
- View data at design time
- Export barcode as an image
- Combine data from multiple tables
- Import existing files
- Advanced graphic resizing and image rotation
- Create compliance labels
- Serialise copies and labels with auto increment/decrement
- Connect to any ODBC database. Ability to import data natively (i.e., without an ODBC driver) from Microsoft Access, Microsoft Excel, Paradox, dBase, QuickBooks, plus others. (Ability to sort and filter data records)
- Compatible with QuickBooks, v2002 and higher
- Support for custom fields from QuickBooks
- Supports proprietary thermal printer languages (with ZPL & EPL thermal printer language option)
- Enhances serialisation by serialising numbers/auto increment, alphabetic and user defined lists
- Set password on command line for access databases

WaspLabeler supports the most popular barcode symbologies including:

- Code 39
- Code 93
- Code 128
- UPC-A
- UPC-E
- RSS14 Stacked Omni-Directional
- EAN/JAN-8
